

On the Subject of More Code

Knowing Morse and its letters is boring, let's spice it up a little.

- The module will flash a modified version of Morse code, where Dits and Dahs flash alongside Dots and Dashes.

Character	Unit of Time it Takes to Flash
Dit	1 Unit
Dah	5 Units
Dot	3 Units
Dash	15 Units
Space Between Letters	5 Units

Dit

Dot

- Identify the word being flashed in More Code. A red flash is placed in between each letter. This word will be the row in one of the tables on the following pages while edgework will be the column. The intersecting cell contains the correct frequency for this word. Submit this frequency by pressing the digit displays to cycle them and then pressing the bottom button. Upon striking, the flashing word will change.

	If there is a lit indicator with the label of BOB.		Otherwise...	
	If there is only one vowel or one "Y" in the serial number.	Otherwise...	If the serial number contains only one letter in "Faulty."	Otherwise...
ALLOCATE	4.248	4.276	4.205	4.209
